SUMMARY

Mining Technology Specialist focused on reliability, system stability and operational performance in production critical environments. Experienced in maintaining and improving complex systems across both software platforms and active mining operations, combining full stack development expertise with field-based troubleshooting, root cause analysis and system optimization. Able to operate in high-risk, real-world environments, ensuring system uptime, diagnosing cross domain issues (hardware, software, communications) and applying cybersecurity principles to strengthen system integrity and resilience.

Canadian citizen. Eligible for TN status in the United States under CUSMA.

SKILLS

- Mining and Data: Maptek Vulcan, Whittle, MS4M fleet management platforms (C4M, R4M, H4M), Power BI, Python, MATLAB, AutoCAD
- Software Development: C#, .NET, ASP.NET, Java, C, C++, Python, TypeScript, JavaScript, Angular, React, Next.js, Node.js, HTML, CSS, REST APIs, SOAP
- Data and Infrastructure: PostgreSQL, Microsoft SQL Server, MySQL, SQL, Linux, Docker, Shell Scripting, Microsoft Azure, Oracle Cloud Infrastructure, Git
- Embedded and Hardware: Embedded Systems, FPGA, VHDL, Quartus, HCS12, Altera DE2, Android
- Languages: English (Advanced), French (Advanced), Spanish (Intermediate) and Turkish (Advanced)

EXPERIENCE

MINING TECHNOLOGY SUPPORT SPECIALIST

04/2026 - Present

MS4M, Montreal, Canada

- Provide technical analysis and troubleshooting for distributed fleet management systems in active mining operations, working across the C4M, R4M and H4M platforms and their truck mounted onboard control units.
- Diagnose and resolve faults across site servers, containers, networks and real time dispatch, conduct root cause analysis and support truck hardware integration and inertial navigation system calibration.
- Contribute to deployment, maintenance and performance monitoring at the Eleonore (Dhilmar), Magino (Alamos Gold), Valentine Gold (Equinox Gold) and Tocantinzinho (GMining) operations.
- Platform stack: C4M (Java, TypeScript, Node.js, React, C++, gRPC, PostgreSQL), R4M (JavaScript, Node.js, Sails.js, Power BI, PostgreSQL), H4M (TypeScript, Node.js, React, C++, REST, PostgreSQL).

TEACHING ASSISTANT & GRADER

01/2026 - 04/2026

McGill University, Montreal, Canada

- Supported course administration and student communication for MIME 290, 291, 392 and 494, drafting weekly student newsletters, maintaining course content and grades on myCourses, coordinating CO-OP reporting, managing departmental events on Eventbrite and keeping student resources and handbooks current.
- Graded MIME 325/526 by reviewing submissions, recording marks and feedback and coordinating with the instructor to keep evaluation consistent across the cohort.

.NET DEVELOPER

12/2024 - 03/2025

Osmose, Montreal, Canada

- Analyzed and improved enterprise backend systems, identifying defects, documenting system behaviour and implementing fixes that improved reliability and maintainability.
- Identified and mitigated system vulnerabilities, strengthening application security and resilience across distributed environments.
- Worked in .NET, ASP.NET, C#, SQL Server and GeoServer within multi system integrations serving Bell, Telus, Vidéotron and Hydro-Québec.

FULL STACK DEVELOPER

07/2021 - 01/2024

Inovestor, Montreal, Canada

- Diagnosed and resolved system level defects affecting application stability in production on the RPM Eco platform. Repaired nonfunctional features, optimized data handling and developed full stack features in C#, .NET, ASP.NET, React and Next.js against SQL databases on Microsoft Azure.
- Improved reliability and performance on the VIA Rail platform by resolving backend defects, optimizing system integrations and strengthening authentication and security mechanisms. Contributed full stack work in C#, .NET, AngularJS and Node.js on Microsoft Azure.

EDUCATION

MASTER OF ENGINEERING, Mining Engineering

08/2025 - Present

McGill University, Mining and Materials Engineering, Montreal, Canada

- Combining mining engineering with a computer engineering and software background, working at the point where technology meets resource extraction. Coursework covers mine economics, equipment management and the application of computational methods to mine planning and operational decisions.

GRADUATE CERTIFICATE, Cybersecurity

08/2024 - 10/2025

McGill University, Information Studies, Montreal, Canada

- Covered cryptography, network security, operating system hardening and information security management. Built practical experience in threat assessment, incident response and security policy design through virtual labs and simulation exercises.

BACHELOR OF APPLIED SCIENCE, Computer Engineering

09/2017 - 06/2021

University of Ottawa, Faculty of Engineering, Ottawa, Canada, French Immersion Stream

- Built a foundation in programming, digital systems, hardware and software integration and networking. Electives concentrated on embedded systems, real time operating systems, software requirements analysis and software architecture, covering microcontroller programming, system level design, real time task management and the design of scalable, maintainable software.
- Awarded the University of Ottawa Access to French Studies Scholarship for full-time study.

VOLUNTEERING

- | | |
|--|-------------------|
| • VP Activities at MMGESA of McGill | 10/2025 - Present |
| • Volunteer at Tech Events: NorthSec, McGill Tech Fair | 04/2025 - 09/2025 |
| • Equity Committee Representative at MISSA | 03/2025 - 09/2025 |
| • Volunteer at McGill Arts Collective | 01/2025 - 04/2025 |
| • Innovation Committee Member at The Post Graduate Students' Society | 09/2024 - 04/2025 |
| • Volunteer at Montreal Festivals: Salsa Convention, Highland Games, MUTEK | 05/2024 - 08/2024 |
| • Volunteer at University of Ottawa Model United Nations Associations | 09/2019 - 05/2020 |
| • Volunteer at Rotaract Club of Ottawa | 09/2018 - 05/2019 |

INTERESTS

Competitive Golf, Outdoor Sports (Hiking, Climbing), Fitness & Martial Arts, Performing Arts (Improvisation, Acting)
