SUMMARY

Mining Technology Support Engineer focused on reliability, system stability and operational performance in production critical environments. Experienced in supporting and improving complex systems across both software platforms and active mining operations, combining fullstack development expertise with field based troubleshooting, failure analysis and system optimization. Able to operate in high risk, real world environments, ensuring system uptime, diagnosing cross domain issues (hardware, software, communications) and applying cybersecurity and risk engineering principles to enhance system integrity and resilience.

Canadian Citizen (Eligible to work in Canada, United States [TN] and Mexico [TN]).

SKILLS

- Software Knowledge: Git, Python, Java android Studio, JavaScript, JQuery, Bootstrap, TypeScript, Node.js, Next.js, Angular, React, Vue.js, Visual Studio, Spring Framework, REST APIs, SOAP, C, C++, C#, .NET, ASP.NET, HTML, CSS, XML, SQL, MySQL, Microsoft SQL, IIS, Microsoft Azure, Oracle Cloud, AWS, Tortoise SVN, Docker, MATLAB, VHDL, ModelSim, AutoCAD, PHP, Kotlin, Xamarin, .NET MAUI, CMake, Shell Scripting, Quartus, Roff, WordPress, Go, Ruby, Gherkin, Maptek Vulcan, Whittle, Microsoft Office.
- Hardware Knowledge: Windows, Linux, Ubuntu, Fedora, Arch Linux android, iOS, Embedded Systems, FPGA, HCS12, Altera DE2, K-CSP, K-ECS.
- Excellent oral and written communication skills, scientific and critical mind, leadership, teamwork, cultural intelligence and time management skills.
- Languages: English (Advanced), French (Advanced), Spanish (Intermediate) and Turkish (Advanced)

EXPERIENCE

MINING TECHNOLOGY SUPPORT ENGINEER

01/2026 – Present

MS4M, Montreal, Canada

- Performing engineering analysis and troubleshooting of distributed fleet management systems in active mining operations, working across the C4M (Unix, TypeScript, Node.js, React, C++, gRPC, PostgreSQL, Java), R4M (Unix, JavaScript, Node.js, Sails.js, Power BI, PostgreSQL), and H4M (Unix, TypeScript, Node.js, React, C++, REST, PostgreSQL) platforms and their truck mounted APK control systems. Diagnose and resolve faults across site servers, containers, networks, and real time dispatch, conduct root cause analysis, and support truck hardware integration and IRIS calibration. Contribute to system deployment, maintenance and performance monitoring across multiple sites, including the Eleonore (Dhilmar), Magino (Alamos Gold), Valentine Gold (Equinox Gold), and Tocantinzinho (GMining) operations.

TEACHING ASSISTANT & GRADER

01/2026 – 04/2026

McGill University, Montreal, Canada

- Supported MIME 290/291/392/494 course administration and student communication by drafting weekly scoop emails, maintaining course content and grades on myCourses, coordinating CO-OP reporting, managing departmental events on Eventbrite and keeping student resources and handbooks up to date.
- Maintained clear grading notes for MIME 325/526 by reviewing submissions, recording grades and feedback and coordinating with the instructor to ensure consistent evaluation.

NET DEVELOPER
Osmose, Montreal, Canada

12/2024 – 03/2025

- Analyzed and improved enterprise grade backend systems by identifying defects, documenting system behavior and implementing solutions to enhance reliability and maintainability. Identified and mitigated system vulnerabilities, improving application security and resilience across distributed environments. Worked with technologies including .NET, ASP.NET, C#, SQL Server and GeoServer within complex multi-system integrations supporting major telecom clients Bell, Telus, Videotron and Hydro Québec.

FULL STACK DEVELOPER
Inovestor, Montreal, Canada

07/2021 – 01/2024

- Diagnosed and resolved system level defects impacting application stability and reliability in production environments for the RPM Eco platform. Improved backend functionality by repairing non-functional features, optimizing data handling and enhancing system robustness. Developed and maintained fullstack features using C#, .NET, ASP.NET, React, Next.js and SQL based databases within a cloud hosted environment (Microsoft Azure).
- Improved system reliability and performance for the VIA Rail platform by resolving backend defects, optimizing system integrations and strengthening authentication and security mechanisms. Contributed to fullstack development using C#, .NET, Angular, Node.js and Microsoft Azure, enhancing both backend stability and user facing functionality.

EDUCATION

MASTERS OF ENGINEERING, Mining Engineering
McGill University, Mining and Materials Engineering, Montreal, Canada

08/2025 – Present

- Combined mining engineering with computer engineering skills, focusing on integrating technology and innovation within the resource extraction industry.

GRADUATE CERTIFICATE, Cybersecurity
McGill University, Information Studies, Montreal, Canada

08/2024 – 10/2025

- McGill University offered hands-on training in cryptography, network security, OS hardening and information security management. Through virtual labs and simulations, developed skills in threat assessment, incident response and security policy design preparing for roles in cybersecurity analysis and defense.

BACHELOR OF APPLIED SCIENCE, Computer Engineering
University of Ottawa, Faculty of Engineering, Ottawa, Canada, French Immersion Stream

09/2017 – 06/2021

- Developed a solid foundation in programming, digital systems, hardware-software integration and networking. Through focused electives, gained hands-on experience with embedded systems, real-time operating systems, software requirements analysis and software architecture. This included skills in microcontroller programming, system-level design, real-time task management and designing scalable, maintainable software preparing to build reliable and efficient technology solutions across various applications.
- Awarded the University of Ottawa Access to French Studies Scholarship for full-time.

VOLUNTEERING

- | | |
|--|-------------------|
| • VP Activities at MMGESA of McGill | 10/2025 – Present |
| • Volunteer at Tech Events: NorthSec, McGill Tech Fair | 04/2025 – 09/2025 |
| • Equity Committee Representative at MISSA | 03/2025 – 09/2025 |
| • Volunteer at McGill Arts Collective | 01/2025 – 04/2025 |
| • Innovation Committee Member at The Post Graduate Students' Society | 09/2024 – 04/2025 |
| • Volunteer at Montreal Festivals: Salsa Convention, Highland Games, MUTEK | 05/2024 – 08/2024 |
| • Volunteer at University of Ottawa Model United Nations Associations | 09/2019 – 05/2020 |
| • Volunteer at Rotaract Club of Ottawa | 09/2018 – 05/2019 |

INTERESTS

Competitive Golf, Outdoor Sports (Hiking, Climbing), Fitness & Martial Arts, Performing Arts (Improvisation, Acting)
